

Virtual dermatology provides faster, more convenient diagnosis and treatment for skin, hair, and nail conditions.

Dermatology remains one of the most inaccessible medical specialties in the nation.¹ MD Live Dermatology is a convenient way for members to access and receive diagnosis and treatment for over 3,000 dermatological conditions by the largest national network of board-certified dermatologists.

Utilizing asynchronous dermatology consultations, the average wait times are reduced from over one month for an in-person appointment to less than 15 hours from request to diagnosis and treatment plan.²

MD Live is

Proven

We deliver proven scale, outcomes, and affordability — and back it up with value-based care arrangements.

Patient driven

Our high-quality provider network, easy-to-use single platform, and consumer expertise create industry-leading patient satisfaction.

Innovative

We innovate where it matters to deliver best-in-class core virtual care solutions.

MD Live Virtual Dermatology advantages

- + **MDLIVE Dermatology is an excellent option for managing chronic, low-risk skin conditions** such as acne, rosacea, and eczema without long wait times or the inconvenience of an in-person appointment.
- + **No appointments are necessary.** Patients supply basic information about their health and medical history and photos of their condition. A board-certified dermatologist then reviews this information for diagnosis, treatment plan determination, and issues a prescription, if necessary. Visit information can be shared with the patient's primary care provider.
- + **Virtual dermatology can reduce the potential for missed or improper diagnoses** due to treatment avoidance, inability to schedule a visit, or need to see a non-dermatological specialist due to lack of availability.
- + **Our partnership with dermatologistOnCall** means your members have access to the largest national network of board-certified dermatologists, who have an average of 4 years of clinical experience.

MD Live believes in the power of providing impactful and innovative health care to improve lives. Let's work together to deliver on that promise to your members.

Teledermatology Cost Savings

+ Teledermatology studies have shown savings of \$140 per new patient compared with a conventional dermatology model.³

+ Teledermatology can lower medical costs by an estimated \$1.5 billion over five years through treating psoriasis alone.⁴
